

2022 REPORT TO THE STATE OF MARYLAND – SPEED MONITORING SYSTEMS USE

Fiscal Year 2022 (July 1, 2021 – June 30, 2022)

Introduction

On October 1, 2014, the *Speed Monitoring Systems [SMS] Reform Act of 2014* was enacted and became effective. This law, which can be found in detail in Transportation Article §21-809, requires local law enforcement agencies or local jurisdictions that operate/administer, as permitted by law, a speed monitoring program [colloquially referred to as “speed cameras”] to report certain specific information regarding their program to the Maryland Police Training and Standards Commission. Information from the previous fiscal year is required to be reported by October 31st of each year. The Maryland Police Training and Standards Commission is required to provide the General Assembly with a report of the information provided by the local law enforcement agencies and local jurisdictions by December 31st of each calendar year.

Methodology of Collection and Submission of Information

The Maryland Police Training and Standards Commission developed a basic reporting document in 2014. The reporting document was updated beginning with FY18 reporting. The agency head and, as applicable, the individual who submitted the report for the prior year for every local jurisdiction received an email reminder in September 2022. Agencies that had submitted data for the previous year also received a template for the current year. Agency heads for all other law enforcement jurisdictions in Maryland received an email advising them of the reporting requirement in the event their agency had implemented SMS during the calendar year. An agency that indicated adding SMS in their jurisdiction during the report period for FY22 was provided with a template.

Transportation Article §21-809(k)(2) requires each jurisdiction to self-report the following information to the Commission:

- i. total number of citations issued;
- ii. number of citations issued, and the number voided as erroneous violations for each camera;
- iii. gross revenue generated by the program;
- iv. expenditures incurred by the program;
- v. net revenue generated by the program;
- vi. total amount of any payments made to a contractor under the program;
- vii. a description of how the net revenue generated by the program was used;
- viii. number of employees of the local jurisdiction involved in the program;
- ix. type of speed monitoring system used by the local jurisdiction;
- x. locations at which each speed monitoring system for each location at which it was used;
- xi. the activation start and stop dates of each speed monitoring system for each location at which it was used; and
- xii. number of citations issued by each speed monitoring system at each location.

Reporting Jurisdictions

A total of 46 agencies were identified as operating speed monitoring systems in FY22, an increase of three agencies from the previous year. Data for the 46 reporting agencies is provided below.
